Ti-1000 Inline Thermal Transfer Printer

The latest in print head technology is here! Fast, quality printing is now available with the Ti-1000 Inline Thermal Transfer Printer. Design and print your own test, barcodes, graphics or logos directly to the surface of bags or roll stock. Floating-edge head eliminates the need to adjust the head for varying media thickness and allows for extended print head life.

Graphic Capability: Print with a selection of over 60 fonts, 20 types of bar codes (including European specification bar codes), lines and graphic images.

High Quality Print: Printing at speeds of up to 10 inches per second and up to 305 dpi, the Ti-1000 produces clear, clean print.

Durability: Durable construction provides protection in heavy industrial manufacturing environments.

High System Performance: High throughput can be obtained with "on-the-fly" formatting. Faster downloading of large label formats is achieved with an onboard 16-bit CPU and large memory capacity.
